

Tooth Buds

This is one of the most innovative and fun programs for children and parents. The children actually like to go to the dentist when enrolled as one of our **TOOTH BUDS!** Our goal is to have young children grow up in our practice with no tooth decay and no fillings.....ever!

We have developed a **CAVITY PREVENTION** program which is custom designed for each child, using nutritional counseling, fluoride treatment and individualized care.

Thousands of young children have graduated from our Tooth Buds Program and are now young adults with beautiful smiles. Most have never experienced even one “filling” and they enjoy going to the dentist.

The Tooth Buds Program is part of our mission: “Changing the World, One Smile at a Time...” Enroll your child today!
